

Napco Security Systems Delivers First Control4-Certified Alarm Panel Line

Simple Device Discovery Protocol (SDDP) and Integration via Ethernet Simplify Installation for Home and Business Automation Systems

DENVER, Sept. 11, 2014 /[PRNewswire](#)/ -- **CEDIA Expo 2014 -- Napco Gemini™ Security System kiosk in the Control4 Booth #430** -- Napco Security Technologies, Inc., a well-known security system manufacturer, and Control4 Corporation, a leader in residential automation systems, are pleased to announce that Napco Security System software has recently been Control4-certified. The new integration with the Control4® platform enables Control4 Dealers to quickly and easily integrate security within their projects and offer state of the art protection of homes and businesses.

The Napco Gemini Security Series is also the first security panel line to integrate with Control4's Simple Device Discovery Protocol (SDDP). With SDDP, the Control4 system can automatically find and add SDDP-enabled devices to the platform, dramatically reducing complexity and the installation time for Control4 dealers. Napco's Gemini™ Security System Alarm Panel is "automation-ready" and can be integrated to Control4 via Ethernet.

Napco's new system software allows Control4-supported devices to be managed based on activities detected by any NAPCO Gemini Security System Alarm Panel (GEM-P816 to GEM-X255) including 8 to 255 zone models, and supporting classic and contemporary Stay/Away Keypad functions. Control4 users can monitor, manage and control alarm panel activities such as arming while home or away with Control4's 4Sight service providing Anywhere Access to its end users; disarming a burglar alarm or a fire alarm; or creating other alerts such as a specific zone opening and/or closing and execute actions such as lighting scenes.

"We are excited about the release of the NAPCO security panel driver. This release demonstrates our growing partnerships in building the connected home ecosystem with industry leading manufactures," says Paul Williams, VP of Security & Communications Products / Support Services. "This release also highlights our partner program and the ability for manufacturers to utilize our SDKs to create drivers that allow their products and solutions to be integrated in to the Control4 solution."

Jorge Hevia, SVP Sales & Marketing for Napco said, "We're pleased to integrate Napco's security technology with the Control4 platform and enhance the consumer's smart connected home experience while expanding our availability within the custom integration market."

Napco Gemini Security System integration will be demonstrated at CEDIA Expo in the Control4 Booth #430 in Denver, CO, from September 11 to 13, 2014.

Napco Gemini Security Systems are sold thru independent professional security distributor wholesalers, and available to Control4 Dealers. For more information, contact Napco www.napcosecurity.com, 1.800.645.9445 or Control4 www.control4.com.
