

NAPCO Security Technologies Announces School Security Project

- San Diego, CA Unified School District will standardize schools on NAPCO's Continental Access Control -

AMITYVILLE, N.Y., Oct. 25, 2016 /[PRNewswire](#)/ -- NAPCO Security Technologies, Inc. (NASDAQ: NSSC), one of the world's leading solutions providers and manufacturers of high tech electronic intrusion security, IoT connected home, video and fire systems, as well as enterprise-class access control and door locking products, today announces that the San Diego Unified School District will be using NAPCO's Continental Access control system in it's schools as a standard.

Currently there are four schools being retrofitted this fall and the system is already installed in ten schools. In total there are 200 plus schools in the district. The installations will be an ongoing process for years to come.

NAPCO's Continental Access division provides products that ensure access control to many types of commercial buildings such as schools, hospitals and office & residential high rise buildings. The system allows for end users like schools, as an example, to initiate a lockdown in 10 seconds. It also tracks the names of people entering and exiting the building during the day.

Richard Soloway, CEO of NAPCO commented "We are proud to be installing our Continental Access product in the San Diego Unified School District. This is just one of the many schools who have chosen to use the system. Our products are developed with the protection of students and faculty members in mind. We look forward to having a longstanding relationship with the San Diego Unified School District."
