

NAPCO Security Technologies Releases All-New School & Campus Website

- Launch to Drive Growth in Lucrative and Profitable School Security Business -

- New Website to Assist Integrators in School Safety Implementation -

AMITYVILLE, N.Y., June 26, 2017 /[PRNewswire](#)/ -- NAPCO Security Technologies, Inc. (NASDAQ: NSSC), one of the world's leading solutions providers and manufacturers of high tech electronic intrusion security, IoT connected home, video and fire systems, as well as enterprise-class access control and door locking products, today announces the recent launch of the newly designed SAVI School website at www.savischool.com, as part of the Company's ongoing K-12 and Campus Security initiative.

The revitalized website has a brand new look with easier navigation which will be appealing to dealers and integrators as well as others involved in the school security implementation process. As a long-time trusted source in some of the largest school districts and leading educational institutions across the country, NAPCO Security Technologies has developed a wide range of security technology solutions with the schools' needs in mind, to fit any classroom, campus & budget. Currently NAPCO products are used in thousands of schools across the US. There are over 100,000 K-12 schools and 10,000 colleges and universities in the US. LocDown™ security solutions offer an integrated range of products that address the needs of any educational institution, with a range of low-cost mechanical locking protection, mid-range electro-mechanical locking solutions and advanced wireless networked electronic locks with global remote control features on the high end.

As an educational resource on school security expertise and combating campus vulnerability, NAPCO created SAVI™, the Security Access-Control Vulnerability Index™, an objective evaluation tool in an easy electronic checklist form, that can help evaluate and grade a campus' current security in minutes, and more importantly point to specific areas for improvement, in an instructional, brand-agnostic, electronic format. SAVI is downloadable from the site www.savischool.com.

Richard Soloway, CEO of NAPCO, commented, "We are excited about the new launch of the SAVI school website as this will be a driver for our already large and profitable school security business. The need for school security is urgent as many schools in the US are still lacking in this area and we continue to see and hear about violence happening on a frequent basis. NAPCO continues to invest its resources in this large underpenetrated market, as we are focused on doing our part to keep the nations schools, students and faculty safe from potential intruders."
