

## **NAPCO Security Technologies Announces School Security Project at Albany County Schools in Wyoming**

AMITYVILLE, N.Y., Feb. 15, 2018 /PRNewswire/ -- NAPCO Security Technologies, Inc. (NASDAQ: NSSC), one of the world's leading solutions providers and manufacturers of high tech electronic intrusion security, (including recurring service fee revenue), Internet of Things (IoT) connected home, video and fire systems, as well as enterprise-class access control and door locking products, today announced that its Continental Access division products are being used in a project for the Albany County Schools located in Wyoming.

The project has over 110 of the Company's Networx wireless locks protecting access to entry doors of the school buildings. The system allows for lockdown capabilities and has real time event linking, mapping and scheduling. The Networx locks are fully integrated with the Continental Access Enterprise Class platform.

Albany County Schools have buildings with approximately 4,000 students attending classes. Stuart Nelson, Assistant Superintendent stated: "After much consideration we have chosen the NAPCO products for this project due to the great reputation the company's products have and the ease of integration as well. We take the safety and security of our students and faculty seriously and are pleased to have completed this project using NAPCO products."

Richard Soloway, CEO of NAPCO commented: "We are excited to have our wireless locks used in the Albany County Schools. Our products are being used to create a safe environment for the students and faculty members at the different schools in the county. Our product portfolio includes options for every K-12, College or University which enables all of our nations schools to have the protection that is needed in the current environment. There are 100,000 K-12 and 10,000 Colleges and Universities in the US and we are proud to do our part in protecting schools."
