

NAPCO Security Technologies Announces School Security Project in Anderson County, Tennessee

- 600 Architech & Trilogy Network Wireless Locksets to Be Installed -

AMITYVILLE, N.Y., July 22, 2019 /PRNewswire/ -- NAPCO Security Technologies, Inc. (NasdaqGS: NSSC), one of the world's leading solutions providers and manufacturers of high tech electronic intrusion security, school safety lock down systems, Internet of Things (IoT) connected home, video and fire systems, as well as enterprise-class access control and door locking products, today announced that Anderson County School District located in the state of Tennessee will be installing products from NAPCO's Continental Access division and Alarm Lock division as part of a new security platform. The district has approximately 6,600 students with 17 different campus locations.

The new security platform will include the use of Continental's CA4K enterprise software integrated with six hundred wireless locks from NAPCO's Alarm Lock division. The wireless locks include Architech locks for the interior classroom doors and Trilogy Network locks for the exterior doors. The CA4K software integrated with the wireless locks allows for campus wide lockdown activation within seconds in an emergency situation. Additional features of the Architech and Network locks include the ability for wireless updates in order to make ID changes for faculty and students, schedule routines, and audit trails with date /time stamps.

Richard Soloway, CEO of NAPCO commented "We are very excited to announce another school security project. The importance of securing our nation's schools remains very high and we here at NAPCO remain focused on providing solutions for every school, big and small. We would like to thank the Anderson County School District for selecting our solution in order to create a safe learning environment for their students and faculty. We are committed to school safety and we expect our business in this vertical to continue to grow for the foreseeable future."
